

## Sprint #2 Report - Wag More v2 17.05.17

Vincent Della Morte  
Katerina Chinnappan  
Gustavo Gomez  
Danny Moon

**Actions to stop doing:** Everything is going good so far, so we just need to continue what we are doing.

**Actions to start doing:** Comment the code a little bit more, right now it is readable, but we are going to end up writing more features. We have created a style guide and need to adapt our code to it. Adapt the new code for mobile.

**Actions to keep doing:** Keep our bi-weekly meetings, and work on the same version everyone has so we don't have a version control problem.

### **Work completed/not completed:**

- Task 1: Layout for shop COMPLETED
- Task 2: Create database for shop items COMPLETED
- Task 3: Create paw currency, database, increment COMPLETED
- Task 4: Forum layout COMPLETED
- Task 5: Forum features, voting, history of forum, adding to forum COMPLETED

### **Work completion rate:**

All tasks are completed. Total hours spent: roughly 25 (more than our estimated 8.5). Average story complete per day: Depending on the one we used, CSS took longer than expected (Didn't realize we need a special one for every different phone). The paw currency took some time, especially figuring out how to increment based on time. The shop design and forum also took some time and we had to adapt the code for other devices as well.
