wag more

Version 2.0

Vincent Della Morte (PO), Katerina Chinnappan, Danny Moon, Gustavo Gomez

WHAT IS WAG MORE?

- A networking/dating app for people with dogs!
- Continuation of CMPS 183 Project!

What are we going to add?

- Additional features as an inbox to view sent and received messages
- Global storyline feature
- A gift shop
- Mobile and desktop friendly
- Deploy to Python Anywhere
- Possibly make a compatible app Android/iOS

SPRINT 1

As a user, I would like to be able to:

- Be able to access my messages easily from an inbox
- Be able to view the app on my mobile device

As a coder, I would like to:

- Be able to read the code clearly (it's kinda gross right now...)
- Be able to make an inbox so users can easily access their messages
- Fix and edit the code so it looks clean

SPRINT 2

As a User, I would like to be able to:

- Add a forum functionality
    - Start a story, have the functionality to be continued by any user
    - Receive one coin daily for contributing towards story
    - Limit contribution; no more than one post a day
    - Be able to like a certain story; best story gets featured
- Add a virtual shop with virtual gifts (example: roses, teddy bear,) something cute 😍
    - Be able to send each other gifts

As a coder, I would like to be able to:

- Code the virtual shop, story functionality, easy, readable code

SPRINT 3

As a user, I would like to be able to:

- To have a bugless experience

As a coder, I would like to be able to:

- Fix Android/iOS app.
- Fix bugs that occurred throughout the Sprints
- Add more features
- Deploy app, possibly make a compatible app for Android/iOS
- Make sure webapp looks good on mobile/tablet devices

DIAGRAM

Sign up, create profile, get matches, message/block people (starting point)

Create and post to dog stories

Collect "pawz" (our virtual currency!)

Buy goodies from the virtual store (teddy bears, hearts, new emojis, food, and more!)

Vote on the best weekly dog story (but don't vote for yourself…)

Send goodies as gifts to your matches!

CHALLENGES/RISKS

- For our 2 new members, learning Web2Py and the documentation
- Going back to old code and deciphering it
- Making it look as good on mobile as it does on a computer

More to come…

TARGET SOFTWARE & HARDWARE

wag more

Version 2.0

THE END!

Any questions?
